## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to a dosage unit comprising  $17\beta$ -estradiol-3-lower alkanoate, classified in class 424, subclass 401+.
- II. Claims 12-20 and 44, drawn to a method for hormonal replacement therapy, classified in class 514, subclass 171 and 178.
- III. Claims 21-28, drawn to a method of contraception, classified in class 514, subclass 171 and 178.
- IV. Claims 29-43 and 45, drawn to a process of making a granulated pharmaceutical composition and the composition made by the same process, classified in class 424, subclass 401+.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The invention of Group II functions for hormone replacement therapy and the invention of Group III functions for contraception.

Inventions IV and II, III are related as process of making and process of using the product. The use as claimed cannot be practiced with a materially different product.

Since the product is not allowable, restriction is proper between said method of making and method of using. The product claim will be examined along with the elected invention (MPEP § 806.05(i)).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
